London Cei. 30.- The Arreay situation Affincingati. Oct. 32-President McKinley has been as travated by the French sem - bas had a continuous ovation here today official note made public un Tuesday last from the time of his arrival at 1950 p. and reading; "The news from West Africa foresan fows great difficulties at Nik. of the Commurcial club was over. Ha ki and in Borgu. The Niger company (British) is sending officers there to incompromine wis reached and the strike ofte rebellion and distribute arms to the natives. In view of this situation. French troops have been dispatched to tie distriet from Senegal, as a preventative route to Walnut H: ls, where Kirse icin, measure. Moreover, the British nygoriators for a settlement of the Nig or question have been in Paris for over a week, at noon, the public receptions by the and everything points to Great Bitain chamber of commerce and the Young see ting to let matters drag! Scemingly Men's Business club in the a lernoon she does not intend to discuss the quesction, but means will undoubtedly or found to foil these factics."

Then the situation was further aggra-

hal of the Borgu evritory, "provided the French government behaves reasonably. If was added, however, at the colonial office, that Great Britain has taken the determination to nore effectively, poice her territory and if the French persist in trespassing, complications will naturally arise.

Inclined to Temper. The wording of hese stagements, it is pointed out, shows that both sices are the clined to lose their tempers. Even the

unexcitable Times says:

If the French are unw se enough to persistin carry out the theory of effective possession constituting a title, they will find that we shall be reluctantly obliged

to apply it too." It is one of the rare occas ons upon which the press is unanimous, papers of all shades of opinion promising the Marquis of Salisbury the nation's support in "bringing the French fillbusters to their senses." It is amusing to hear the world's most a

notorious land grabbers, condemning. France for following a similar policy. France, however, seems equally determined not to recede. In fact, the St. Louis' speech of the French colonial manister, M. Labon Seems to show that the cardinal feature of Evenchypolicy in 21rica is the extension of French influence . from the west coast to the Nile valley, and thence to Ethopia, which means in uninterrupted series of posts and protec-Storates. In short, with excitement rampoint at home, there is impositent danger por the rosing armed expeditions meeting in Africa. The situation is brimfull of

ed and two, ramawit wounded, to so the Sir Edward Grav, in 1895, informed France fibit my myas on of that territory would All Indians who know of the difficulty, he regarded as an unfriendly der, and the present secretary of state for the am's post on it upper Egypt, is thereby

dangerously in periled. The appointment of Charles John Da - ling, Q. C., Conservative M. P. for Den seem to be at all excited but and rather ford), is the judicial hereb, is severely gritty sed, Alben it was mooted, there were process against the appointment and since it was aunounced on Thursday last, the leaders of the bench and be; and the public of both parties, have soverely and openly censured, the defior There were five oncks, one eget, in the potoriously low, the worst examples, if spirits of, the law copres are fulking of organizing a idemonstration of disags sworn in. Midland Reorganization.

New York, Oct. 21-An adjaurned meeting of the directors of the Celorado Micland Railroad compan, was held in this city today: Two nev directors were elected, namely, f parles A. Otis of this efty and Charles Boeticher of Denver. They take the places made vicum by the resignations of Goorge Bertine and Louis G. Johnson. The new directors, it was declared, do not represent the foreign interests in the road.

President listine authorized the state ment that the new company will take possession of the road on November 1. 4r will abandon the Busk tunnel on that. date and send all trains over the Hagerman pass, which was recently rehabilitated.

Western Passenger Assoc atlan.

. Chicago, Oct. 28.- The meeting of the lines of the Western Passenger association, with the Union Pacific resulted in an agreement to restore the old basis of commissions on November 12. The Union Pacific stated to the opening of the meeting that it had no objection to the abolishment of the nigh commissions that have for the last two nonths, been pult on north Partie coast, business and or traffic to Colorado cominon points. This was about all there wits to settle, and sthe meet ug adjourned.

Midland Reorganization. The reorga ization of the Co orade Midland Railroac, company was formally completed Tusday af ernoon in New York. George W. Rist ne, formerly receiver of the road was elected president and a full belief of directors was elected. The meeting of the bland holders then adjourned un'il tomorrow, when it is befleved some of the marry of directors will be repliced, by representatives of the German interests of the road. ımmigrant Business.

Chicage, Oct. 26. -The western roads and the Southern Puelfic have finally dilimmigrant business, to arbitration. This matter has been aging fire for three Mears, and has been the source of nearly all of the demoralization that has ex- wellisted in immigrant rates. A meeting was ngld two years since between the Southmembers of the emigrant clearing house in New York over the percentage of Californin bus ness that should the allowed to the Southern Pacific. . It demanded 59 per cent, of all the bushess and the cent. Ar stratton was poropsed but the Southern Pacific could not see its way in this manner and the trouble went ou. Now it has been arranged that the matter shall be so tled by arbitration, and he is uncerstood that ir the arbitration the Southern Paritie is ito rece ve not fess than. 25 per cent and not more than 30 per cent. The pard of arbitration will he composed of one member selected by each party to the arbitration and the third is to lie so ecter by the first two.

But Little Doubt. Washington, Oct. 26. -Although the government officials decline either to affirm or delive the report of its, acceptance of the new broposition of the reorganiation commit be of the Union Pacific rall-

This proposition is understood to be an increase of the original guarantee big of \$50,000,000 to a sum sufficient to cover the full amount of the government's caim against the Chion Pacific road St. Paul, Oct. 75. New York Tr bube. The statement was mad the solder day probably fane ful but it contained . sug-

g sellon of more than passing interest France charges Great Beltain with fall are to fulfil he promise to withdraw from rgypt, Leaving iside the most peritnent question, whether the proper time Egypt is sufficiently complete to, wagrant their departure, an effective "to quoque a gament comes to hand. France went in-Times year's before Great British went into liggiff, and for far less sufficient shours of Cliba Bre, and then angels, wid Plante. France did so, moreover, under country, Jules Perry gave such a pledge ment even promises not to dredge out the These promises were as definite as those of Great Britain regarding Egypt.

The French are, however, still in tall to seession of "unis, and are treating it ir all respects as an integral part of their colonial empire. Such it, of course is, They have dredged out the harbor of Hiserta, and made it what they proudly call one of the tinest unval harbors in the dest they have sent some of their great searships thither, and made it a powermionists are flecking in, and there is evbry indication that. Junks belongs to France just as much to Algeria does, And

Since Great Dritain does not object to this, but, on the contrary, has actually facilitated the installation of the French Turis in full power, it is deemed by many only logical and lair that France should concede the right of Great lastain to hold on to Egypt. Of course, the purallel is not entirely piercet, and analories are not always infallible rules in international deal ugs. But there is enough in it to form the basis of some pretty si coulations.

## ' Mr. Pul man's Bequests.

Chicago Record. George M. Pultinan's will, filed to the probate court yesterday afternoon is a remarkable document, both as a strong in lication of character and as a sign of the difficulties which beset men who wish to dispose of charmons wealth with the best results. The public bequests have evidently been made with careful study and consideration. Thirteen public, instith lone receive \$10,000 each, but, what is of far more import once, the very large sum of \$1,200,000 he se uside for the establishment of a free y annual training school in the town of Pulman.
This last bequest is the one which must

commend itself to the general public not

afone for the amount indicated, but as a

Taken of the danot's good, ludgment. problem which always confronts men of wealth is the question of giving away their money in some way which will insure beneficent results without increasing the influences which tend to pauper ze. It would be casy enough to give with open-handed generosity to curities. It is also easy in this way to create a! class which will lean on charity instead of using temporary aid merely as a means toward independent manhood and womanhood. Among all the schemes for wise giving which have ret buch devised none better than that which proposes to inyest money where i will tend to educate young men and women to be self-reliant. The manual training school answers this purpose better, resulbly, than any other form of educational institution. When properly conducted it may be the means: of atting thousands of young people to take-care of themselves, giving them the ability which will make them independent and put them beyond the need of

This beneficency will rank first camone Mr. Pullman's bequests, and even there who have been disposed to criticise his attitude in indus rial matters will adm t cheerfully that ie has done wisely n tils. The same judgment which gulded him in this bequest is to be found in the nore personal/items of the will? which makes liberal gif s o most of the members of the family, but leaves Mr. Pu man's two sons with but \$3,000 h verif each. The Spartan sever ty with which he cut off the sens on the ground that they had not shown themselves capable however, came to early for large properties indicates a London solvol to Ph. adelphia in 1530 he ter.

"Prun to His Trust as a book for boye by Edward S. Etts. (The Penn Publishing company, Philacolphy, 5 \$1.250 and as one will be led to sespect on to hall a spect from its title, it has for its hero a young gentlemais of a they obtained propriety of ideas. That the next should be something of a pring a not unnatural, consulfunother and his leaguess, processing to his face at every appointualty; and that in consequence be should think it right and proper to an the noble sentiments he has picked up from them with an iteration somewhat weark ome to the reader. is equally to be expected. This is the main drawback of the book. The notite t sentiments are too much obtrade! the "moral tembries" is a little too much inevidence; the powder may too plainly be detected in the am. )

Another drawly is k, though one less likey to be noticed by the voung reader; is a be construction of the story. The plot has very much-the appearange of he mg been originally two plots, put tage her in order to till out, the desired number of pages. There is so deelded a break (bon) two-thirds of the way through the hook that one looks involuntarily over the page to see if he la

not about to begin another tales ! In spire of all Nils ( in story is not with out decided mer is. It is written up good language; and the por is quite exciting enough to keep a boy's attention to the end, though the ending uself is rather forced, t The here has lots of pluck; a spirit of adventuce which carries him into one or No remarkable scrapes, and good sense with a large stee of good fortune which carries him out again, and though the principle that Chonesty is the best po ley" bad been better indicated without daying I down se emphatically in solugity words, he little-critical reader for whom the book is intended, will hardly fail to receive the impression the author so clearly intends to convey.

The book is well printed and well illus-

## "THE FESERAL JUDGE."

"The Federal Judge," by Charles K. Lush (Houghton Mittin & Co., Boston and New York.) is a movel which has attracted musual attention. As a district judge Tracy Dunn is a delightful study. He is a man of marked will and strong prejudices, but he is portrayed as a charicter not ilkely to be influenced as we see him later, when shrough corporation infuences he is blevated to the federal smob Ellintt fairduell, the amb tlou high light in the tory, is the not unusual

clever man pulation of the old gudge, his handling of his partners, his love-makingto Harriet Dunn, his lightning mastering; of entomology and his making the of the. lawyer Emmerskey, who le the good to mg man really in love with Miss Imphilance presented with more than usun Some idea of Gardwell may be formed from one sentence of the author:

"While Girdwell was as soft-spoken a man as ever wregked a railroad or hour- It will not be long pefore you wil, begin to tled a corporation in a sea of watered stock, by tways higher, in his driet. subtle and corsuastic way, that the end i justified the means, and that easis o tentimes arose where the greatest good to the greatest number demanded action; which at times might appear to be contrary to be he the letter of the law and The equity,"

The timely illustration of the well of injunction is to us the most interes his part of the book. The thrend is very weak upon which hangs the fate of Judge thomas som who has the away from home. Gardwell is the piver of the whole story and me reach on with freetally excitement to learn of the introl this great Accorning a rat read builder and Wall street barb.

"Simon Dale," is a story of the times of Tribune, that he will be almost as popular Charles H. of England. This b t of news, that chough, however, but dierr is a dir most who read it. But to enyone who folterence in the popularity of a man who lows the course of modern fiction it means can write a "Prisoner of Zenda" and one a great dest. Anthony Tope has apparwho can write a "parid Copported," Mr. ently given up writing modern remance time a romanue hero worely tweed walking mit and an Afoine hat. A new kind of fletion had been invented, and, the promise was bright. Everyone felt that the romantic's ory of times past had been done almost tradeath, but this regorous Autumn Fiction number, and contains 10 offshoot spemed likely to grow for many

Just how Authory Hope has been led onto the broad and easy, path that leads tto "costume s crics" we cannot tell. It is possible that contemporary Weymanescue fiction is prooving an invironment of overpowering strength it is possible that he has grown lazy. "The Heart of the Princess O-ra" was a stumble in the wrong direction, and "throse," are incffeetual effort to ml. back. "Simon Dale seems to comman him irrep levably to this quet. There is to the to be sire, of a ser-quet. of "Zerd", but we col terribly atraid Mr. Hops will invent some method of butting that back a contumy or two.

'As to "Simon Dale," we do not wish to be misunderstord. It will probably be a very good story jut it wil probably be a stale lwhich a last dozen other writers imight have written, and there is absolutely no one but Anthony Hope who could have given us "The Brisaner of "The Prisoner of Zenda," CA Mar. of Mars." The Indis-gretion of the Discuss," and "The Doily. findiques."-(The Chap Book.

Mrs. Gertrude Atherton tells me that her new novel. "Patience Sparity k and Her Times," has actually 'made, her' here, and that no, only has it been greet! ed with great geniality by many London journals but that it has caused her to receive numerous stresh offers for literery work. I have already writen, in these commuse, concerning the strength and shine of "Petigaces" A canwhile Mrs. Atterton informs me that all American ray ews, except one in the Boston, Herof Olive Schreiner which was included aid, have proved stoutly, adverge. This author is extremel's fortunate in finding 2 herself a prophet outridether own country. Most America; novelists, when they are disregarded in Broadway get very little satisfaction from Piccadilly. Mr. Brot -Harte, " should say, 's the only, American fauthor who can affor I to sliving his shoulders at any neglect which his narive land may reveal. Surely its career has need amazing. More than 27 years ago he made his reputation, and for many years

since he has lived on English soil. - Yet all this time, he has been an extremely prolitic writer, pouring forth short novelettes. These bave constantly dealt with the atmosphere and doings of: the Far West. In his own country he retains a vogue, yet me far slighter than that of the past. But u England, I hear, he is highly esteemed, and commands very large prices for his work. How he can possibly keep up to see conious descriptions of climes and manners which he has not personally known for a quarter of a century seems carious enough. To go on, as he does, writing of Occidental gamblers, desperadoes' bushwhackers, gold-diggers, in a country where every such type, if found there at all, is ay much of an itinerant curiosity as the this reported that Lombroso, who went critics, not an unusual frame of inited for king of Siam, flavors at least of oddity. loves these regions as to, nake them the constant theme of his fiction, way should doubt he must by this time have become "inglicized" in spirit, appet from taste. ply turns up its nose at all novels which York, Boston, New Orleans, and even Chicago fell, to interest it. What polely. the illiterate, the provincial-the wilds by Arizona, Daletta, Nevada, California, And even for these it has often but he languid glance. It prefets to store at its own reflection in its own mky fill imes. Paris idoes the same thing with her Seine, but then Paris has a spendid excuse, for st

that there is no getting ric of them. They are made this year help its ined. so that they are scittole for winter &

rowns One of these who tight-nitting over the hips and flaring around the toot. The waist was blouse, with full basques,

These gowns are what may be stried the early winter cosmime. They are padded and are to be worn without a least It is a little too soon for the p abgowns wilch come out later for public Inspection in thow places, yet here are n few Lrecently saw. One I noticed particularly was made of

almond green cloth. The skirt was a double god t skirt with all of the fullness carried to the back. At the left side the skirt was elaborately braided with black ron ache braid. . There was a corrage of white sating covered with accord on-plated cream mousseline de soie, aux over that was worn a short bolero of the green cloth. The bolero was short and rounded at the back, and at the front it was draped up to the bust line, where it was arranged into a box pair that was fastened to a band of deep violet velvet. The look plair, was fined with velvet diffeta, and from the center there fell a leasence of

cream mousseline de sole. The edges of

the bolero were elabo ately braided in black soutache braid. The sheves were long, close-fitting coa sleeves, draped,

very high. A deep share of violet velwas used for the morrow, draged eirdie. The dressy little that worn with this gown was of rough green straw, trimmed with quantities of orchids, shading from pale lilac to deep purple. At the back of.

the hat there was a tall bow of green taffeta ribbon.
I nonced that several of the very smart. gowns, had double skirts, but they are only worn to advantage by tall, slender women, for the break in the lines of the

skirt just at the knee detracts-considerably from a woman's height.

Another pretty light cloth gown was of a pale shade of green. The skirt was a godet, close fitting over the hips, with all of the fullness carriet to he back. was trimmed round with two-inch. bias folds of the coth heaced by fo ds of blap's velvet edged with soutache. ' he corrage was a blouse of the gray old h. perfect'y plain at the back, with a front

that lapped a trife to the left side.

At the front the corsing was cut V to show a clemisette of white sat n with a tail crush collar of the satin mounted by a frill of white mousse me de sole. The corsage was turned back to form revers. These revers were covered with white lace over white satin. The edge of the revers nearest the white satir chem sette was braided with black silk soutague. Three frogs of back soutache came from it is eft under-arm seam and fastened the

corrage at the front.

The high girdle was of white satinat was almost obscured by the black tache braiding. The sleaves were very long and close fitting at the e bow. There they were trimmed round with five blas folds of the cloth and mounted by, short pulls.

As the orders are apparwill prove to be in the alter rocks con- entity heavy at this figure we do not artiguous to the eruptive core, and in the ticipate a further decline.) case of at least three of the properties they did not make mines until their staft were down from 450 to 600 feet . .

Boubright & Co. say: the experienced mining engineer, was courte ously permitted to look through turned, and this on showing small gains, the workings of the Elkton inme. Mr. The reports from A. .. warrant higher · Weston has been prominently associa edare now two-thirds of the total, the with the covelopment of the Cripple Creek district during practically its bisshipm of made derive the past work: and up to the end of 1866 the value was of important enterprises in that carps. close to helf and bill as between gold and. He has been acquainted with the Elk (n salver taking the average tun from month almost from the begaining, having reto month. This mercase in com favors ported on the property as they as 181; deeper in ding in the Lake City district. hence he is peculiarly fitted to form an opinion of its present condition and presspeets. This opinion is a highly favorable. Mr Georgo Bernard, president of Par-21. 48°7. Mr. Westen says:

demonstrated as follows:

which point they followed what is known which appears to run parallel with, and in places to cross, the Walter vein; Ellyon shaft as they got out of it sout a list to make substanti. I increase in presof the Elkton shalt on the fourth level out rates. in what is known as the Elkton yeln. I . The market during the week has been myself saw ore taken out of the Elkion quiet and practically enquireless. Tradand the feet north of this point, on the 'mines list' the prosucts keing neglected' same level. I took a piece of very rich and but a langual attres, taken in the ca averite ore of the same character out unlisted. An except on inethe latter case of the very center of the basalt dyke: was Gold Com, which advanced rapidly (urthermore, at this point Mr. Wi sun is during the week. n general, the high stoping and shipping the basait dyser class stocks were study, and a majority This was illustrated plainly in plate X of of them secred substantial advances. Cross & Penrose's 'Geology and Min ng Industries of the Cripple Creek Dis rict; and in page 185 the baralt dyke is liesignated as the Catherne cyke', which, it is further stated, thas produced the the ore of the Catherine mine as wel as some of the ore of the Elkton mine, it must be remembered that at the period this was written probably the velt had the organization during the past week not been worked to any extent beyond of a movement to systematically advertise the Catherine shaft.

between the Catherine shaft and the old made had catherine made by Cripple Creek and Elkton shaft, appears to be what he to the opportunities it presents to the joins the Catherine dyke at this point.

"It this theory then be correct they' have, in addition to the Walter vein, the Cripple Creek has furnished three-fifths E kton vein (des gnated the basalt dyke) ages 26 fiches at a value of 22 ounces, for the whole distance of the claim north of the Catherine shaft practically un-worked, and unprospected but from which Mr. Wilson is now actually ex-

tracting dre. "On the south in the fourth level the vein was discovered by cross-cutting to the east, by the late management, and they now have a body of ore four feet in width which Mr. Wilson is breaking and shipping. This gives an additional for the fiture. One of the owners was hard body of stoping ground south of fore the attention of the investor and the showing some very rich free gold specifithe shaft. The end of this drift cannot seeker for business opportunities. The Strong is the nearest competitor of i mens taken from there. In character it he many feet now from the granite conpany's treasury until the amalgamation the Polo Coin in output, and when the resembles the Scotla ore. The specimens fact, and it remains to be seen whether

"The dater which is not more than say lies only about a sulf mile from the town.

lons a minute, are handling it easily. "The error has also hitheto seen made and is months. This property is situated of following what was, supposed to be; in the flat of the gulch, just at the end - walls' through the entire mine, with a cracks 'or planes,' Mr. Wilson has fustituted a work of cross-cutting throughore behind these so-called walls; and indiscovery of large bodies of ore luthert)

> It is thus apparent that in all probachility there is at least two years' ore above the present lowest levels, and t seems to my that there is a greater proability that the output of ore during tocoming year will be increased rather than decreased, unless something unforsern happens, and that with the systemutic way in which the rathe is being nut in shape by the new, magager this ore will be produced at a lower cost.

"Ypurs very truly, c

#### Dividend Payers Active. their market report for the week ending Oct. 30, Meser-, Carnduff & Ruse &

Prices throng jout the week have been well systemed and the his with few exceptions shows, a slight advance. The trading has been most betive in the div dend payers, such as Ekton, Moon-An-

chor and Portland. Muon-Anchor stock since the closing of the books has gone far towards regaining the amount of the dividend, and there Is a strong demand at lel cents. Reports from its mine are most flattering. "The last shipment of high grade ore returned \$160 per ton, the second grade, bringing in ment of a Plactent divident.

Elkton shows an accane; of 2 cents, and the rumors of an increased extra div-

Portland was in strong demand in the beginning of the week and the price thrup mith the granite, but promise that it again to about the came, quotation as Month after month frabella's surplis

now been reduced from \$100,000 to something over \$50,000. Blind faith in the future of the property brings intorders which absorb the large amounts daily offered for sale! The price advanged to 294; dropped) In their last weekly letter Messrs, W. again to 25%, and closes at Trasked. The healthien condition of the market.

shows a shrinklige and the treasury has

A 'lew days ago Mr. William Weston, for silver has resulted in an increased domand for 't id silver stocks, but i Arget -The reports from A. .. warrant higher prices, but news from the Mollie Cibson mine gives little encouragement to stockholders.

#### Increase in Dinidends. .The following is from the weekly-letter

of John W. Propert & Co.: The steady increase in the production A of the Cripple (Sock destret is heginning to tell in the dividend list, the dividence one, and the ough the kind permission of paid by public companies now amounting to at deast \$190,000 per month. It is believe Elikton, company, 'we are ably to present, ed that a sum equally as large is being it herewith. In a letter to us dated Oct, earned by mines the process in which thre closely-hold and reports of prolits are Through the courtesy of Mr. George not made public. The dividend list in a he comme best at an equy day, as this Bernard, president of the Bikton Mining been growing raindly of late and is now company, and that of his manager, my larger than over before. Moreover, the old triend, Walter Wi son, I was emilled next few months promise to add majerial-19 make an investigation of the lower by to the aggregate sum. Gold Com will workings of their mine, and the result of undoubtedly soon begin to make its, conmy examine tion is as follows:

Tribution of Standard morthly: Victor must tribution of Stoins monthly: Victor must "Mr. Walter Wilson, the new manager, sound again enter the 181 with \$10,000 or has only been working the mine for wo \$20,000; mere see in Ekion and Poils months, but it appears to me that he has, land are not unlikely in the near intuce. Elkton vein proper left the workings to blues on the diedend list. All this will The El Paso Gold, Lest. Dollar, Orphan the east near the Catherine shift, from Bines on the desdem list. All this will come about in the natural development as the Walter voin and also a hasalt dike of the camp, but the building of the new ra lroad from Celorado Springs and the consequent reduction of treight and treatwhereas in fact the basalt dyke is the ment charges will be a potent factor not Elkton vein, one of the proofs of this, so- only in hastening the day when many ad-Ing that they are now getting the same ditional properties will become dividend ore out of it some distance north of the payers, but in enabling those now on the

For some time past it has been recog-

inized that the mining interests of Colo-

studo in general and the Cripple Creek re-

alon in particular were not receiving the aftention of the country generally which. their Tapidly growing importance warranted. This feeling has crystalized in the Cripple Creek district. It is believed According to Whitman Cross, the sup- the time is ripe for such a concerted efposed Eikton vely which left the drifts fort to draw public attention to the recdesignates as the Rayen Dyke which investor. This record is a remarkable one. When the books are closed on Dec. '31 next it will andoubtedly be shown that of the gold output of Colorado for the current year and one twentieth that of the world. It will further be shown that Colorado's gold output has increased fully 275 per cent, during the past five years. while that of Cripple Creek has increase. ed 500 per cent, during the same period. These are surprising figures, and it is believ& that they need only to be published throughout the United States and Et. rose to attract to this region as never be-

from one shovel of dirt taken from ti kes place. Money necessive to defray new bins are up and the rai read is built he was exhibiting were word as an this yein, or basalt dyke, extends into the Bround Hog, unter ease and bond to current expenses, he werer, is expected, to them on grade the mine will also be some. pagned in cents in foc. This property

CONDITION OF THE TOM BOY The Owners Are Satisfier With the

Montevilleo, 5000 at \$1.50 per 1000;

Present Outlook. Since the discharge of a large, portion of the working force of the Tom Boy mine, two weeks ago, many and various rumors have been in circulation in regard to the condition of The property. The resident stockholders of the company have been reticent regarding the situation, but recent arrivals from Tellurido give what is a reasonable explanation of the situation. When the Exploration company took the Scoperty an exploration was ordered of a portion of the ground, which the former owners of the mine did not think was valuable. The ground was thoroughly explored, howexpressed about its value. The workmen employed in this part of the mine have. Hunter be declared nul and void. been laid off and present operations are
